

CDVI
Security to Access

Datashee

ISO25 - Printable ISO Card

Product Description

The ISO25 is a thin, printable PVC card. It contains a 125 kHz RFID chip. This affordable RFID proximity solution is ideal for any standard access control project.

CDVI offers a variety of access control credentials with different technologies (125 kHz proximity or MIFARE®) You'll find the ideal credentials to meet the needs of your installation. You can also customize our CDVI cards and tags with your own company logo (minimum order of 1,000 units).

Key Features

- Compatible with CDVI Wiegand readers
