

Datasheet

KPROG - Card Enrollment Device

Product Description

CDVI's USB card enrollment device is a desktop unit used to simplify card and tag management. Using a USB connection, the unit plugs directly into a PC and eliminates the need to enroll users via active or in-use readers.

Compatible with the ATRIUM software and web server, just place the credential on the unit and the credential details are automatically detected and added into the card fields.

To guarantee the highest level of security, the KPROG mandates an HTTPS connection. This ensures that all data transmissions are encrypted and protected.

KRYPTO
HIGH SECURITY SOLUTION

Key Features

- USB port connection
- Reads MIFARE® Classic and DESFire® EV2/EV3 credentials
- Compatible with ATRIUM software and web server
- Visual feedback
- Low power consumption

 Certification

 DEEE

RoHS Certification

 IP54

 IK10

 -40°F to 158°F
-40°C to 70°C

Product Specifications

Material:	Polycarbonate, ZAMAK®
Mounting:	Desktop
Technology:	DESFire® EV2/EV3, MIFARE® 13.56 MHz
Security level:	High security
Weight:	2.1 lb, 0.969 kg

Electrical Specifications

Power input:	USB, 5 V
Consumption:	270 mA, 245 mA standby mode

Accessories

CS-EV2

MIFARE® DESFire® EV2 card

TAG-EV2

MIFARE® DESFire® EV2 tag

DISCTAG-EV2

MIFARE® DESFire® EV2
sticker
