Overview

A LumiCloud data storage subscription license enables one year of continuous, 24/7 cloud video recording for one LumiCloud camera. This subscription also includes rolling video playback retention from 30 to 180 days based on the selected plan.

Key Technologies

Secure Cloud Storage

LumiCloud provides end-to-end data encryption and secure cloud sever storage.

Built-In Local Buffer Storage

LumiCloud cameras come with a pre-installed 256GB SD card that supports video buffering for up to 27 days when recording at 720p resolution at 30 fps with continuous 24/7 streaming. This ensures video continuity during temporary network interruptions.

Cloud Video Archiving

Archived video is retained in the cloud for as long as the HD Video Unity subscription remains active. Each admin account supports up to 30GB of archived video data (including usage for all subaccounts).

System Requirements and Technical Specifications

Consult the tables below to verify the devices and services the license is compatible with.
