LumiViewer

NDAA COMPLIANT

Overview

LumiViewer is an intuitive, reliable security system management software designed to streamline daily security operations. With its easy-to-use interface and seamless intgration with the Luminys security ecosystem, LumiViewer allows users to view live video, playback archives, and manage event responses from a desktop client or mobile device. Optional license upgrades allow for flexibility and scalability without the hassle or cost of purchasing unneccessary add-ons.

Key Benefits

- Integrates and manages devices within one interface
- Remotely view live video, playback archives, manage event responses, and perform system administrative tasks
- Optional licenses available for scalability and flexibility without requiring significant additional investment

Key Features

All-In-One Control Interface

LumiViewer can effectively manage an entire security system within a single interface. Users can add, configure, reboot, and control devices remotely with the software. Live video viewing, archive playback, and video search is also available.

Seamless Integration With Luminys Devices

Designed to be used with the Luminys security ecosystem, LumiViewer ensures full device compatability and analytics support when used with Luminys cameras, access control, and NVRs.

Access Control Integration

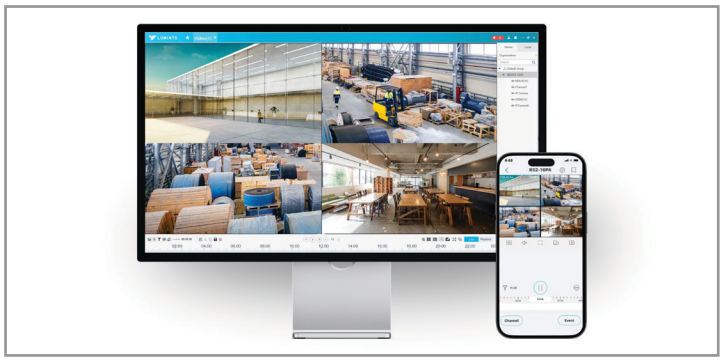

LumiViewer provides simple visibility and control for supported Luminys access devices. Users can view door status, perform remote unlock actions, and review access activity logs directly from the client interface. Access functionality is device-dependent and intended for light-use monitoring within smaller deployments.

Real-Time Monitoring and Event Management

LumiViewer can send real-time alerts when an event occurs. Users can also filter event by type, bookmark important moments, and enable automated event responses such as email alerts and snapshots.

A Look at the Software

LumiViewer allows for seamless, streamlined video monitoring with its smart UX design. The software's provides different video viewing options comprehensive video metadata from multiple cameras with different video viewing options.

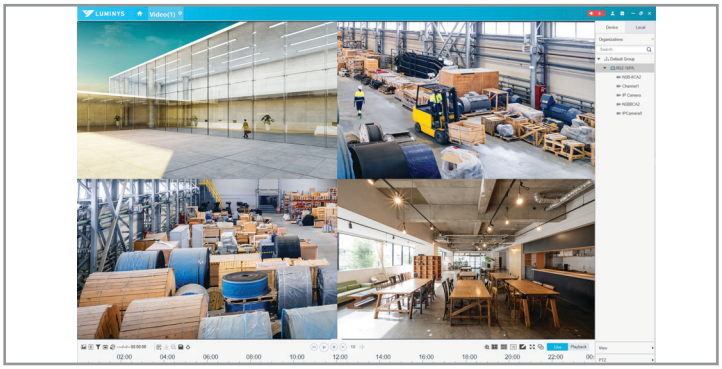

Desktop Client and Mobile App

LumiViewer is available as a desktop client and mobile application to allow for remote or onsite management.

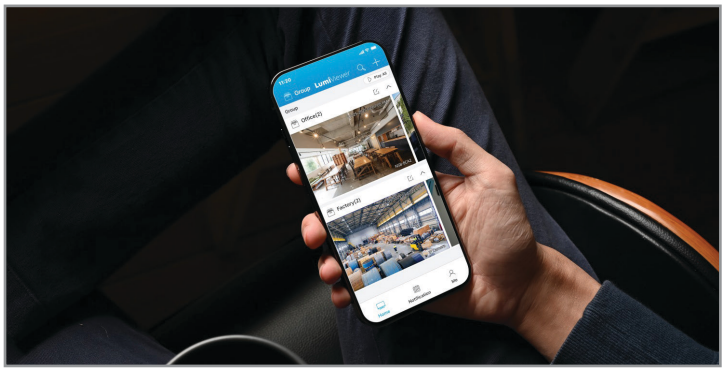

Electronic Map (E-Map)

LumiViewer supports electronic mapping for high-level viewing of security systems and assistance when planning a site or locating devices.

Live Video Feed

LumiViewer allows users to watch live video from multiple cameras and manage event responses.

View Multiple Cameras and Locations

LumiViewer streamlines watching video from multiple cameras across different locations by organizing feeds into one place.

System Requirements

It is strongly recommended to install the latest updates for your operating system prior to using LumiViewer.

Desktop Client

Operating System	Microsoft® Windows 7 (64-bit) , Microsoft® Windows 8 (64-bit), Microsoft® Windows 10 (64-bit), Microsoft® Windows 11 (64-bit), Mac OS*
CPU	Intel Core i5-6500@3.20GHz
Memory	8 GB (Minimum)
HDD	256 GB (Recommended)
Display	1280 × 800 Resolution or Higher

Mobile Client

- iOS 14.0 or Higher
- Android OS 9.0 or Higher

Technical Specifications

General

Language	English, Spanish, French
Compatible Luminys Devices	IP Cameras (Fixed, Vari-Focal, Fisheye), PTZ Cameras, Network Video Recorders, LumiGuardian Solar Trailer, LumiWatch Fixed Solar Solution Video Doorbell and Wireless Chime Kit, Select Models of Access Controllers and Readers*, Hybrid DVR

Video

Maximum Number of Video Channels	**Base Software**: 128 Channels **With Optional LVL-256 License**: 256 Channels
Supported Resolutions	8MP, 4MP, 3MP, 1080p, 720p, D1
Decoding Capability	64 Channels at D1 or Device Maximum
Maximum Number of Simultaneous Live View Channels	64 Channels
Maximum Number of Synchronized Playback Channels	32 Channels
Touch-Sensitive Monitors	Supported

Access Control

Maximum Number of Doors	**Base Software**: 8 Doors Without License Upgrades **With Optional LVL-256 License**: 16 Doors **With Optional LVL-256 and Individual Door Upgrade Licenses (LVL-DOOR)**: 64 Doors
Door Status Monitoring	Supported
Remote Door Unlock	Requires Compatible Device
User Credential Monitoring	Supported
Event Logs	Door Activity, Invalid Access, Forced Entry/Unlock

Events

Video	Video Loss, Video Tampering, Motion Detection, Audio Exception
Analytics *(Must Be Supported by Device)*	Human and Vehicle Detection, Intrusion, Line Crossing, Scene Change, Abandoned or Missing Object, Face Detection
Device Status	No Disk, Disk Full, Disk Error, Device Offline, Voltage or Hardware Exception
Alarm	Invalid Accept Attempt, Forced Door Entry, Door Activity, Credential Events

*LumiViewer for Mac OS does not support access control products.

Ordering Information

LumiViewer Optional Upgrade Licenses

LumiViewer is free for iOS, Android, and desktop clients. The base software supports up to 128 video channels and eight (8) doors. Optional licenses may be purchased separately to increase the software's maximum channel and door capacity.

SKU	License	Description
