## Description

As with all M series cameras, the 1080p HD Dome IP Camera MD2222 incorporates Sense up+, a unique

technology that delivers stunning video in low-light conditions. Utilizing intelligent image signal processing, auto gain control (AGC), and 3D Noise Reduction, the image of this model under demanding lighting conditions does not suffer from motion blur. The MD2222 is capable of producing three independent video streams, and different streams can be adjusted for different applications, depending on the individual user requirements.
